Experience
the ZEN Difference

Welcome to ZEN

Choosing ZEN Windows and Conservatories means you're upgrading your home with a team committed to excellence and care from start to finish.

Your Local Experts

At ZEN, we do things differently. We understand that when it comes to replacing windows or installing a new conservatory, you want a company you can trust—one that delivers quality products, expert installation, and genuine care, without the hassle.

Built on Trust, Powered by Quality

Customer satisfaction is at the heart of everything we do. Over the past 10 years, we've earned a reputation across Bristol for delivering exceptional service and top-quality workmanship. Our dedicated local team takes pride in consistently exceeding expectations, offering you the personal touch that larger companies often lack.

Local Roots, Personal Service

We're proudly based in Bristol and have built a strong reputation serving customers throughout the city and surrounding areas. Our team brings a wealth of experience, local knowledge, and a personal touch to every project. From your first enquiry to final installation, you can count on us for reliable, friendly service and expert advice every step of the way.

Quality That Lasts

All our windows are A-rated as standard and built to last, backed by robust, insurance-backed guarantees. Whether you're looking for windows, doors, or a conservatory installation, you can count on ZEN for long-lasting quality at fair and competitive prices.

No Pressure. Just Honest Advice.

We believe in a relaxed, no-pressure approach. Our experts are here to offer clear, friendly advice and to help you choose the right products at your own pace. With a full range of samples brought directly to your home, you can see and feel the difference before making any decisions. And when you're ready, we'll provide a clear, written quote — no hidden costs, no rush.

Peace of Mind with CERTASS

As a CERTASS-registered company, you can rest assured your installation meets all building regulations and safety standards. Every project comes with a certificate of compliance and insurance-backed guarantees, giving you complete peace of mind today and added protection if you ever decide to sell your home.

Exceptional products. Local service. Total peace of mind.

From Order to Installation: A step-by-step guide to how we work

Here's what you can expect when you choose ZEN Windows and Conservatories.

1 Make Contact With Us

Get in touch on **0117 321 5540**.

Or if you know when you want us to pop around, use our online booking system.

2 Measure and Advise

One of our sales advisors will visit you at home so that we can record your requirements and measure everything for you. We won't give you a price on the day but we use this information to prepare a written quote for you which we will email to you following our visit.

3 Email Quotation

We will email a quote, with drawings and specifications of everything we are quoting so that you have all the information you need clearly recorded, and so that you can check it is all correct and that it meets your needs and desires.

4 Amend or Proceed

If you need anything amending in your quote just let us know and we will get to amending or adjusting it for you. If you would like for ZEN to be the company that carries out this work for you, just drop us a call or a line and confirm you would like to proceed with this work!

5 Purchase Contract

We will draw everything up onto a purchase contract so that you know exactly what you are getting for your money and we will send this to you for you to check and approve.

6 Technical Survey

Once you have signed off your order we will arrange at your convenience for a technical survey to be carried out (this is included as part of our service at no extra cost). The technical survey is needed so that we can take accurate sizes for manufacturing and to make sure everything we are doing for you will be compliant with building regulations. We will also check on any safety or access requirements.

7 Into Production

With manufacturing sizes now recorded following your survey, your chosen products will now go into manufacturing. The lead time between your survey and installation is usually between 4-8 weeks (depending on which type of products you are ordering).

8 Installation Day!

We will make contact with you to discuss a suitable installation date for you and confirm how long your installation will take and what our arrival time will be. When your installation date arrives our installers will carefully and professionally carry out your installation, and of course we will dispose of all of the materials we remove along the way (wherever possible these old items will be recycled).

9 Follow Up

We take care to ensure all ZEN customers are happy customers so we will call to check you are happy with your installation before we send your balance invoice. If your installation is for replacement windows or doors, we will sign off your installation now so that you will receive your certificate of compliance with building regulations. You will need to keep this somewhere safe in case you ever decide to sell your property.

10 Recommend Us!

If you recommend us to a friend, or family member, and they place an order with ZEN, as a thankyou, both yourself, and your friend will receive a £75.00 AMAZON Voucher!

Individuality and style to meet your every need

Bricks and mortar may form the foundations of your house, but it's the doors and windows that really create your home's personality.

With our comprehensive range of high-quality uPVC and aluminium windows, doors and conservatories, you can be sure to find a product that will suit your individual style.

With minimal maintenance, and maximum durability, they'll suit your lifestyle too.

“we’ll help you choose the
products that are right for you”

Safety and comfort for every generation

As well as adding to the look of your home, your doors and windows need to offer you security and protection from the elements.

The latest technology

We offer state-of-the-art door and window locking systems to enhance your home's security and give you extra peace of mind.

Products manufactured using the very latest technology, so you can feel safe, secure and comfortable, whatever the time of year.

The look to meet your every need

We'll help you select the products that are right for your home – whether you're looking for a simple, elegant style, or a more ornate design, with decorative glass, panels or hardware.

Whatever you go for, our doors and windows not only look fantastic, they last for years. So as well as enhancing your environment, you'll be adding value to your home.

The best quality windows that money can buy

We all want the best from replacement double-glazing. That's why our windows stand apart. From styling to performance their advanced design gives you a secure & energy-efficient home.

Reduce wasted energy. Cut bills.

Choosing our windows to replace single glazed or older double glazed units saves money from day one. In fact, it could reduce your heating costs by up to 20% - perhaps worth up to £321 a year.

Reduce condensation and noise.

Lower heat loss at window edges makes our glass 3-4°C warmer - cutting condensation by up to 80%. The high performance gaskets in our double glazing also reduces noise pollution.

Our windows make more of ambient heat

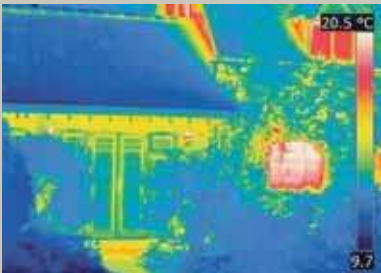

In winter, the energy efficient coated glass used in our windows retains warmth within the home. It's also designed to exploit radiant heat energy from the sun. These properties result in significant fuel savings compared to a single glazed dwelling.

Replacing single glazed...	Could save...
...changing timber framed windows to our energy rated windows saves:	£140 .00 (0.72 tonnes CO2)
...changing aluminium framed windows to our energy rated windows saves:	£321 .00 (1.65 tonnes CO2)

Average gas heated bungalow/semi. GGF carbon calculator @ 2% inflation.

Right: The images show just how effective fitting energy efficient windows to your property can be. The right hand side of the property still has the original windows – the reds and pinks show heat escaping.

However, the new extension on the left is fitted with energy efficient windows, the lack of reds and pinks proving they help dramatically reduce heat loss.

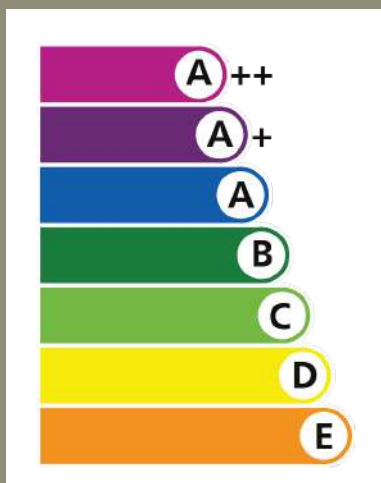

the next windows you choose could reduce wasted home energy by up to 20%

If the windows in your home consist of single glazed or older double glazed units, replacing them with our energy efficient windows will save you money. It can reduce the energy you need to heat or cool your home by up to 20%.

Energy efficient windows – at the right price

Our energy efficient window system brings together market leading components to deliver exceptional performance. This means quality, performance glazed sealed units and the best performing 'warm edge' spacer technology used to separate and seal these glazed units.

Our window profiles include weather seals, multi chamber construction, high security locking and stainless steel hinges.

Using less energy means less CO₂

Science suggests man-made emissions play a major role in global warming and, in turn, influence climate change. Home energy use alone accounts for 27% of UK carbon dioxide (CO₂) emissions which contribute to climate change.

The Glass and Glazing Federation calculates that if all UK replacement windows installed were B and C rated, each household could save the energy equivalent to making 34,000 cups of tea!

Our casement windows are all A-rated for energy efficiency as standard and all of our Sash Windows are A+ rated as standard.

Our casement windows are configurable with upgrades to the specifications you desire and can achieve A+ and beyond to fit your own own needs should you have any specific requirements.

Choose both attractive and durable windows

New windows can enhance the look of your home, both from the inside and out. We offer a wide range of window styles to suit all types of properties.

Opt for traditional white frames, or a natural wood grain effect. There is now a virtually endless choice of uPVC frame colours to choose from.

Choose from our standard range of uPVC frame colours or premium colour options, like the Woodec range of ultra-realistic wood effect frame finish options.

Whatever the style of your property, we'll be able to supply and install casement windows that perfectly match your home.

save money
cut wasted home energy by up to

20%

If your windows consist of single glazed or older double glazed units, replacement with energy efficient windows will save you money.

It can cut the energy you need to heat or cool your home by up to 20%. You could also:

- Reduce condensation in your home
- Reduce your carbon footprint
- Reduce your energy bills
- Add value to your property

Casement windows

Our casement windows are designed not just to enhance the aesthetic appeal of your home but also to deliver unmatched functionality and energy efficiency. Crafted with precision and using German engineered uPVC profiles, these windows open outwardly, with side or top hung vents, allowing for optimal airflow and natural light to enrich your living spaces

Features and benefits

All our casement windows feature energy-efficient glazing and our unique high performing weatherseal ensures your windows will perform year after year.

Other options include;

- Extensive choice of designs
- Available in a variety of foiled finishes, both woodgrain and solid colours.
- Range of handle colours to complement the finish of your windows.
- Wide range of glass designs, from leaded to Georgian bars.

reduce condensation

in your home by up to

80%

Whenever we cook, bathe or even breathe, we increase water vapour in our home. When saturated air contacts a cold surface, condensation forms, promoting bacterial growth and mould.

Both can compound respiratory problems such as asthma. Our windows are typically 3-4°C warmer than those with metal spacer bars, reducing condensation by up to 80%.

“choose attractive, durable and weather resistant windows that complement the rest of your home”

Tilt and Turn Windows

Crafted with precision, and using German engineered uPVC profiles, our tilt and turn windows stand out for their dual opening mechanism, which offers enhanced security and safety.

Versatile and convenient

This special type of tilt and turn hinge mechanism allows you to tilt these windows inwards for ventilation, or alternatively open fully inwards, which is very useful for easy cleaning of the outside glass.

This style of window can also be incorporated into bay and bow windows and is available with a variety of glazing options, including Georgian bars, leaded lights, and obscure glass.

Sleek and modern in design, tilt and turn windows combine effortless style with practical convenience. Their clever inward opening makes cleaning safe and simple from indoors, while providing excellent ventilation and a low-maintenance solution without compromising on looks or performance.

energy efficient windows

Reduce energy bills

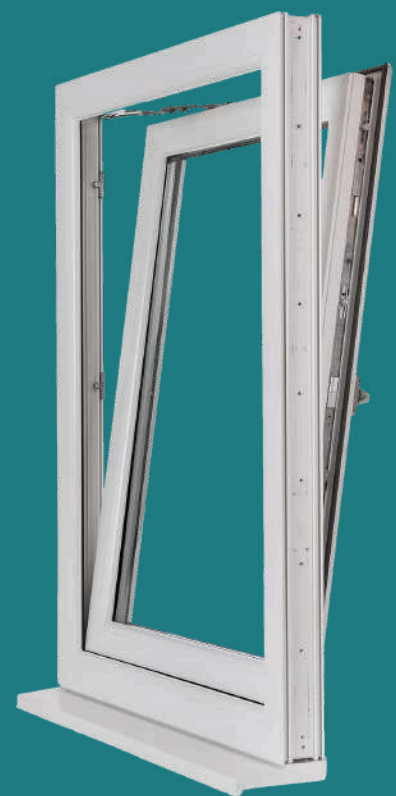

Specifications

Our tilt and turn windows are designed with a five-chamber system for optimal thermal efficiency, helping you achieve high energy ratings of up to an A+ WER and u-values as low as 1.2W/m²K.

These windows are available in a wide range of premium surface finishes and colours, including smooth and woodgrain options, so you can find the perfect match for your home's style.

As well as looking great, our tilt and turn windows are built with your safety in mind. They feature multipoint locking systems and high-security hinges, offering an enhanced level of protection and giving you complete peace of mind.

Bay and bow windows

Attractive, durable and versatile, our bays and bows will suit any style of property and provide valuable extra space in your home.

Bay Windows

Bay windows retain the traditional look of your home creating space, character and allowing light to flood your room.

Bow Windows

Our bow windows offer you the versatility of creating the illusion of space and depth by allowing more light into your home without the need for additional building work.

Reduce outside noise levels

Nowadays it's difficult to avoid external noise. Whether you live near a major road, under a flight path or near some vocal wildlife, noise pollution can be a cause of major disruption. With double-glazed insulation and high performance window seals, our windows will help reduce external noise pollution.

Design options

It's the detail that counts. Make your mark with our design options - creating your own individual style.

Georgian Bars

This style option allows you to tailor your window glazing to create a personal finish for your home. This is achieved by inserting a shaped bar in between the glass panes.

Astragal Bar

Similar to Georgian bars but offers a more traditional finish by planting shaped bars on top of the glass panes thus creating depth to the design and the look of individual glass units.

Horns

Our Mock Horn feature enhances the aesthetics of your windows by achieving the appearance of a traditional vertical slider.

Sash Windows

Our sliding sash window range combines the elegance of traditional sash windows with the benefits of modern materials.. Manufactured from uPVC, they are strong, they will not rot, warp or require repainting. This means that they retain their colour and shape throughout the years and require minimal maintenance.

Versatile and convenient

Timeless and versatile, sash windows bring authentic character with modern comfort. Their smooth gliding design allows excellent ventilation and lighter operation, while modern materials ensure durability and energy efficiency, blending traditional style with lasting performance for every home.

Suitable for both replacing existing timber sliders in period buildings and adding character to any development, vertical sliders retain all the traditional features of their familiar counterpart but with the enhanced benefits that modern uPVC systems provide.

Specifications

Our vertical sliding sash windows offer exceptional energy efficiency, achieving a BFR energy rating of 'A+' as standard. This means they help to reduce your energy consumption and keep your heating costs down.

Each window is made to measure, ensuring a perfect fit, and we can accommodate shaped frames too — whether rectangular, arched, or something bespoke to suit your home.

Doors

“a door range to enhance the look of your home”

Combining high quality materials with first class performance and security - you can be assured our doors will give you peace of mind and an individual look to suit your home.

The right front door can create a great first impression when you enter your property. Patio, French-style, bi-fold doors are a great way to open up a room – and invite the outside in.

We offer all these options in a wide range of finishes – from uPVC doors to composite ones, from simple glazed designs to more ornate styles, with decorative glass or panelling.

As well as being beautifully made, each door is designed to stand the test of time. So they not only work superbly as a barrier, they also enhance your home too.

“a range of doors in styles and colours to suit every taste”

Composite doors

Our composite doors combine modern materials and performance with traditional looks. Available in a wide variety of styles, colours and glass choices, they're designed to meet your every need.

uPVC doors

Our uPVC Panel doors offer a wide range of designs and finishes. These can include full and half panel designs as well as sidelight options.

uPVC doors

Discover the perfect harmony of style and durability with our collection of uPVC doors. Designed to enhance your home's appearance, these doors also deliver outstanding performance and security.

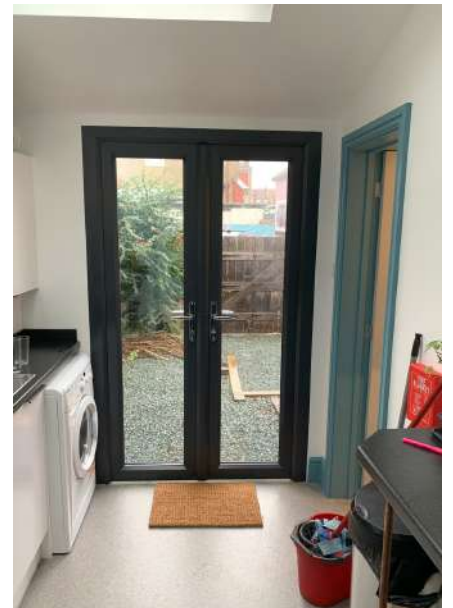

All our uPVC doors are German-engineered with multi-point locking systems for maximum security & peace of mind.

There are also a wide choice of colour options available. Our selection includes some of the most popular shades, from classic whites and contemporary greys to rich woodgrain finishes that replicate the warmth of natural timber.

“our uPVC doors offer
the ideal blend of
elegance and practicality”

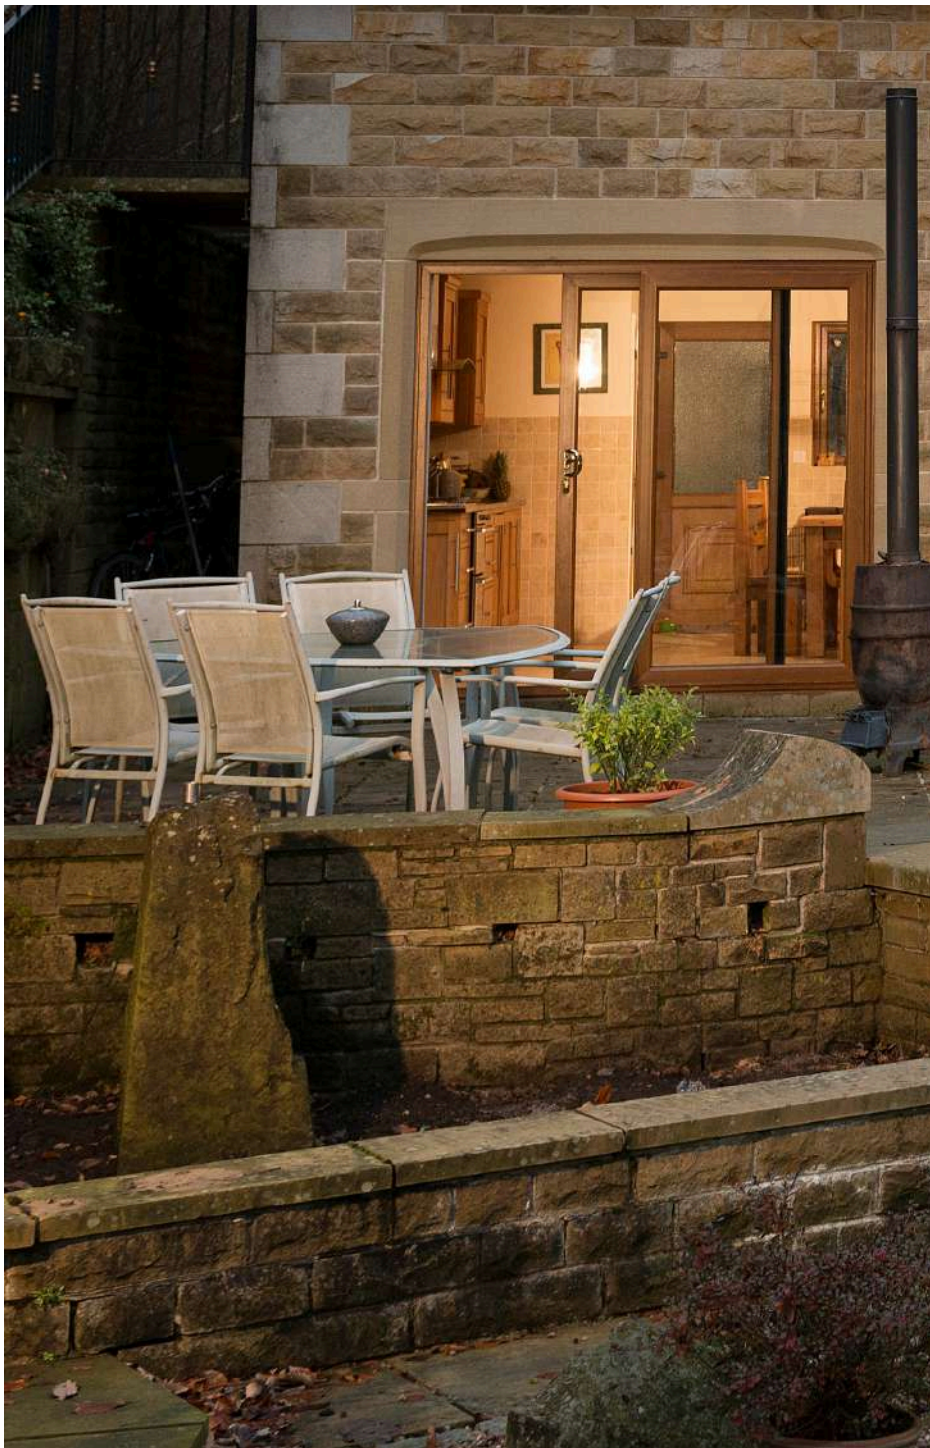

French doors

Throw open French doors and invite the garden, terrace, balcony or country views inside.

A breath of fresh air for your kitchen, lounge or dining room, these beautifully made doors come in a range of styles, colours and finishes to blend naturally with any home.

Patio doors

Bring the garden closer to the house and use it like another room. With easy access in summer and a wonderful view in winter, a patio door adds light and air to life – all year round.

Bi-folding doors

Bi-folding doors are the ideal way to provide extra space and connect inside living to the outside world. They can create a whole new feel for your home, linking rooms together and seamlessly joining inside living with outside space.

Versatile and aesthetically pleasing, bi-folding doors are the ideal replacement for existing patio or French doors to flood any room with natural light.

Amazingly flexible, bi-folding doors give you full control over your space. Open them completely to create a seamless flow between indoors and outdoors, or partially to suit your needs and maintain privacy and comfort.

“our bi-fold doors are
both innovative and
visually stunning”

Aluminium Windows & Doors

We offer a full range of high-quality aluminium windows and doors, designed to bring a sleek, modern look to your home – without compromising on performance, security or energy efficiency.

Why Choose Aluminium Windows and Doors?

Aluminium is the perfect blend of form and function. It's strong yet lightweight, giving you slimmer frames, more natural light, and that clean, contemporary finish that looks great on any home.

It won't warp, rust or rot, and it requires very little maintenance – making it an ideal long-term investment. And because it's fully recyclable, aluminium is one of the most sustainable building materials available today.

Whether you're looking to update your windows, replace a tired front door, or open up your living space with bifolds or sliders, aluminium is a fantastic choice.

Custom-Made for Your Home

Every aluminium window and door we install is bespoke and built to order. We also have over 500 colours to choose from, including dual-colour finishes and a range of textures.

That means you get a perfect fit, a smooth installation, and a look that's just right for your property.

Peace of Mind Built In

Our aluminium products come with our 25-year frame guarantee and are made using the very best UK-manufactured profiles – including AluK, Smart Architectural Aluminium, and Cortizo systems.

Conservatory Roof Replacement

Replacing your conservatory roof with a Warmer Roof System will transform your conservatory making it cool in the summer and cosy in the winter.

A poorly insulated conservatory roof can make your home uncomfortable and costly to heat. Our high-performance conservatory roof replacements solve these issues, making your conservatory a comfortable part of your home all year round.

Quick Installation

With pre-fabricated modular pods, the Warmer Roof system is quick to fit and minimises disruption to your home.

Fully Customisable

Choose from a range of stylish tile finishes and internal designs to complement your home (such as internal perimeter pelmet ceilings with LED downlighters).

Eco-friendly

Constructed with sustainable timber that offers natural insulation and long-lasting performance.

Peace of Mind

Fully compliant with building regulations and backed by a 25-year manufacturing warranty.

No Paperwork

ZEN and Warmer Roof handle all the building regulations compliance and paperwork, so when you order a Warmer Roof from us, you can relax, we've got everything covered!

Conservatories

“a wonderful way to
extend your home”

Most of us could do with more space and light in our homes – and what better way to achieve this than with a new conservatory?

Conservatories have more benefits than you might think. They don't just provide lots of extra room – our insulated roof panels means your new conservatory will retain heat in the winter, and won't be too hot in the summer. So it's a comfortable space for you to enjoy all year round.

A versatile space for all occasions

Deciding which style of conservatory is right for you can be fun – even if it's not always easy. First you'll want to consider how best to complement your home, and what you really hope to get out of your new room.

Will it be a study, perhaps, or a playroom? Or maybe you just want a bit more space to relax.

When it comes to what you want, you're the expert!

So once you've given thought to your lifestyle and how your new room can reflect it, simply turn the page - you're sure to be able to find a conservatory that fits your needs.

“a conservatory should be a comfortable place to relax and enjoy all year round”

Choosing your conservatory style

Victorian

A popular style distinguished by a faceted front, giving a curved appearance. A particular favourite with period properties, however its clean lines make this a winner on any type of home.

Edwardian

A flat-fronted style that offers excellent use of floor space due to the square or rectangular internal shape. Its sloping roof and contemporary style is suited to the majority of properties.

P-Shape

A P-Shape can combine a Lean-To and a Victorian to create a versatile and visually stunning open space. Due to the proportions needed, this style is better suited to larger properties, giving an impressive result.

T-Shape

As with the P-Shape, this style is more suited to larger properties. A combination style that's distinguished by a central projection that can either be a Victorian, Gable or Georgian. A T-Shape offers a large and versatile floor space and is an impressive addition to any home.

Deciding which style of conservatory is right for you can be fun - even if it's not that easy. Sun room, living room or office - we'll help make it the perfect place.

Gable

A gable-fronted conservatory adds a sense of grandeur to any home. Featuring the same rectangular floor space as a Georgian, a gable offers excellent use of internal space. The front panel of the roof remains upright rather than sloping back, to create a feeling of height.

Lean-To

For properties with little room under the eaves or for those homeowners that prefer a clean simple look, a Lean-To conservatory is the ideal choice. The pitch of the roof can be varied, making this a versatile and ever-popular option.

Lantern

The 'original' conservatory style, a Lantern ensures drama and grandeur. Distinguished by the two-tiered feature roof, the height within a Lantern adds an extra dimension to the feeling of light and space.

Custom

Although the shapes and designs shown are all bespoke, you may have your own 'one-off', exceptional or unique idea.

Choosing your conservatory

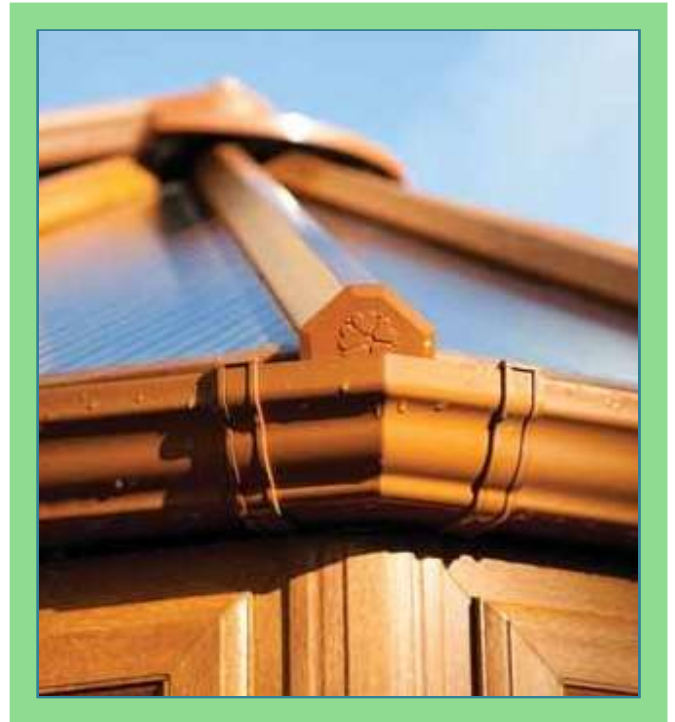

1. Use

What do you hope to get out of your new room? Will it be a study perhaps? Or a play-room? An office? Or maybe just an extra space to relax in. Whatever you choose, its use will determine how large you need your new space to be, and which layout will best accommodate your needs.

2. Materials

Your new space should fit seamlessly with your lifestyle. Materials such as PVC-u are incredibly hardwearing and low maintenance. No need for step ladders and re-painting, oil on the hinges and a wipe down every now and again will keep your conservatory looking like new.

3. Positioning

Think about the position of your conservatory. Those that face the South will receive the most sun during the day. If this is the case, you may need to consider extra ventilation and possibly blinds in order to block out some of the harsher rays.

4. Size

Once you've made a decision on your design, it might be best to check the dimensions of both your house and your garden. A conservatory should be an extension of your current living space, and shouldn't take up valuable garden space.

5. Glazing

New advancements have been made to ensure the glass used in conservatories works its hardest for the homeowner. Keeping you cooler in summer and warmer in winter means a conservatory isn't just a seasonal room.

6. Planning permission

If you're building a conservatory in England or Wales, you will not usually need planning permission. However, it is always better to be safe than sorry. If you are in any doubt always check as early as you can with your local council.

Whatever the weather

When planning how to make the most of your conservatory, there's a lot to consider – its size, shape, and of course, how much sun it gets.

Our heat reflective glass will ensure you enjoy your conservatory all year round. Its unique coating reflects almost twice as much solar energy as standard glass, and reduces the glare on those bright sunny days.

The unique coating reflects about 69% of total solar energy.

Reduce potentially expensive heating bills. Our product outperforms standard glass by more than 50%.

Warm edge spacer technology increases the edge temperature by up to 65%.

This product offers self-cleaning glass that never stops working.

Glare is reduced by 44% all year round compared to standard units.

Technical specification

Windows - from casement to modern tilt and turn, a style to suit every home.

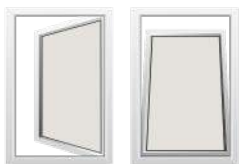

Casement

Casement windows consist of outward opening sashes and fixed lights. This most common product is available in a multitude of styles and various finishes. Sashes can open as side hung or top hung to suit application.

Options

Mock Horn is an option to top hung casements. The bottom of the sash has an extruded feature to give the appearance of a Vertical Slider. Can only be incorporated in top hungs that include a fixed light below.

Tilt & Turn

Tilt & Turn windows consist of opening-in sashes, which can be operated in two ways. Turn handle 90° to tilt top inwards with restrictors, turning handle a further 90° to open fully inwards, hinged on the side for access and cleaning. Available in a multitude of styles and finishes.

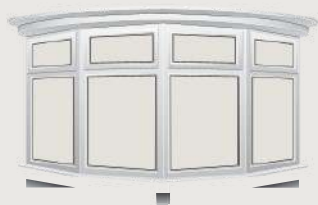

Vertical sliders

Our Vertical Slider combines traditional design with modern technology, available with a range of Georgian bars to create the required look. Both sashes slide vertically to open. They can also be tilted inwards for ease of cleaning.

Options

Vertical Sliders are supplied as single products but can be coupled to any other product to achieve the required look, this includes box bays and multiple coupling.

Bow windows

Our Bow windows offer you the versatility of creating the illusion of space and depth by allowing more light into your home without the need for additional building work.

Options

Similar in appearance to a bay window which projects beyond the brickwork. However, the actual brickwork face remains flush with the main building structure. This type of window does not allow a person to walk into the bay area. Commonly, available on 3, 4 and 5 segments.

Bay windows

Bay windows retain the traditional look of your home creating space, character and allowing light to flood your room.

Options

When three or more frames are fixed together and they project beyond the main face of the building. The brickwork above and below follows the contour of the actual window frames. Therefore allowing a person inside the building to walk into the bay area.

Box bay is when the side windows are at 90 degrees to the front.

Doors -practical, stylish and secure.

Front doors

Our panel doors are made from uPVC, offering a versatile design combined with modern locking technology. They can be configured to open either inwards or outwards. A range of styles is available, including options with side lights. You can also choose from various panel designs featuring different types of decorative glass. In addition, a wide selection of solid colours and woodgrain finishes is available to suit your home.

Options

To allow greater versatility all of our panel doors are available with a low threshold for easy access.

Composite doors

Combining the traditional look of timber with modern high performance materials to produce a range of traditional door styles in a variety of solid and wood effect finishes.

Options

For additional styles and variations please refer to our composite door brochure which can be downloaded from our website!

French doors

Our French doors are made of uPVC or aluminium, combining versatility in design with modern locking technology. Available to open inwards or outwards, a variety of styles are available which can include mid-rails. French doors can also be designed with side panels to span larger openings.

Options

A variety of full and half panel styles are available, for example if used in a front porch, with mid-rails perhaps and a letter plate. Or most popular for leading into a back garden, fully glazed as shown left.

Patio doors

In-line uPVC patio doors are ideal when space is at a premium, as the sashes do not encroach into the surrounding area. Available in 2, 3 and 4 pane options, patio doors can even be supplied with a mid-rail to include a letterplate if required, for example if used as a front entrance door.

Bi-Fold doors

Designed to fully maximise any opening space, bi-fold doors are available from 2 to 6 panes in a variety of opening sequences to suit your needs. Larger styles can incorporate single or even double opening doors for day to day practical use.

Options

There are numerous bi-fold door styles from 2 to 6 panels with various opening combinations.

Finishes and glazing

An exciting range of finishes, a vast array of glazing options and door furniture to suit every taste. The choice is yours - make a design statement.

Finish Options

Our uPVC range is available in a variety of finishes including the ultra realistic Woodec wood effect range. A huge range of solid colours are also available. All can be combined with your choice of glass design, including Georgian, Victorian (square or diamond) stained or diamond lead.

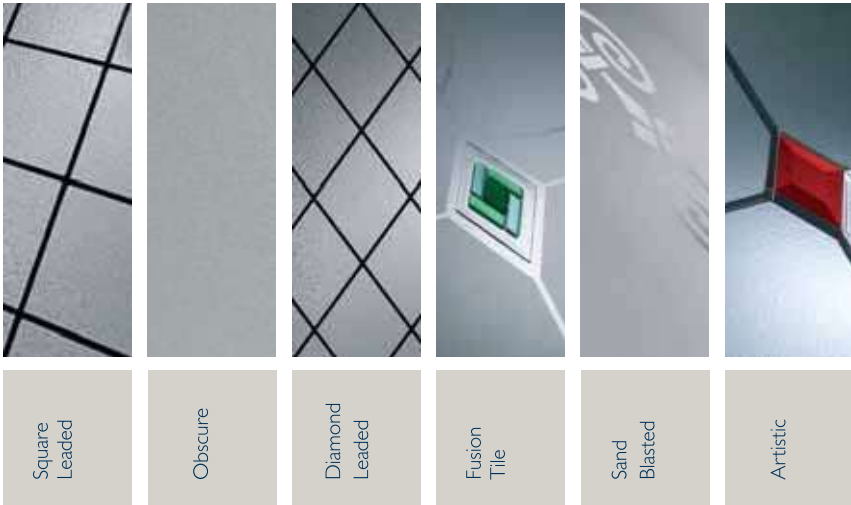

Why choose between elegance and practicality when you can have both?

After all, the right window can make all the difference to a room, so it's important for it to look the part – and be reliable and cost-effective, too.

Glazing

A vast array of glazing options are available. Patterned, stained and leaded for example. We can help you through the selection process and ensure you choose the style that suits your requirements best.

Furniture

An attractive range of door furniture is available including white, satin, black, gold, stainless steel and chrome as shown below; enabling you to select what best suits your home and personal taste.
